BERGER®

QUALITY BUILDING PRODUCTS SINCE 1874

PRODUCT CATALOG

"The reason we've been in
business since 1874...
our pride is forged
into every product."

Founded in 1874, Berger Building Products is North America's leading source of more than 200 high quality roof drainage, moisture protection, snow retention and ventilation systems that protect and enhance commercial and residential buildings. Berger quality, custom capability, competitive prices, and outstanding customer service is trusted by architects and builders across the country.

Berger is a division of OmniMax International, Inc.™, a global producer of architectural copper, cladding, patio, roof and lawn drainage, snow retention, windows and transportation products. OmniMax supplies original equipment manufacturers, distributors, contractors and home centers in North America and Europe.

BERGER GUTTER

K-STYLE GUTTER

MATERIALS:

Aluminum - Painted,
Aluminum - Mill Finish,
Copper,
Steel - Galvanized,
Steel - Painted Galvanized
Steel - Paint Grip

STYLES:

Hemback,
Hi-Back (45°),
Apron (90°),
Straight Back

LENGTHS:

10′, 16′, 20′, 21′, 26′, 30′, 32′
(also available in non-standard lengths)

THICKNESS:

Aluminum - .024, .027, .032
Copper - 16oz, 20oz
Steel - 24ga, 26ga, 28ga

HALF ROUND GUTTER

MATERIALS:

Aluminum - Painted,
Aluminum - Mill Finish,
Copper,
Copper - FreedomGray™,
Steel - Galvanized,
Steel - Paint Grip

STYLES:

Single Bead,
Single Bead w/ 1″ Flange,
Double Bead,
Reverse Bead

LENGTHS:

10′, 16′, 20′, 21′, 26′, 30′, 32′
(also available in non-standard lengths)

THICKNESS:

Aluminum - .024, .027, .032
Copper - 16oz, 20oz
Steel - 24ga, 26ga, 28ga

Steel	Galvanized	#10 24-Thread x 3/4"	BN-S	50 pieces / carton

SHANKS

#1 SHANK PLATE FOR FASCIA

MATERIALS:

Aluminum - Painted, Aluminum - Mill Finish, Copper, Copper - *FreedomGray®, Steel - Galvanized

NOTES:

Accessory item is not formed from FreedomGray® coil or sheet product. It is formed from copper product plated with Tin Zinc coating to provide similar color and properties. FreedomGray® is registered trademark of Revere Copper Products, Inc.

#6 SHANK FOR OGEE OR CROWN MOLDING

MATERIALS:

Copper, Steel - Galvanized, Steel - Painted Galvanized

#8 SHANK FOR CORNICE

MATERIALS:

Iron - Malleable

#10 SHANK FOR FASCIA

MATERIALS:

Copper, Steel - Galvanized, Steel - Painted Galvanized

#11 SHANK FOR NAILING TO EXPOSED RAFTER

MATERIALS:

Aluminum - Painted, Copper, Steel - Galvanized

#12 SHANK FOR NAILING TO SHEETING - 1/3 PITCH

MATERIALS:

Aluminum - Painted, Aluminum - Mill Finish, Copper, Copper - *FreedomGray®, Steel - Galvanized, Steel - Painted Galvanized

NOTES:

Accessory item is not formed from FreedomGray® coil or sheet product. It is formed from copper product plated with Tin Zinc coating to provide similar color and properties. FreedomGray® is registered trademark of Revere Copper Products, Inc.

#25 SHANK FOR NAILING TO SHEETING - 1/2 PITCH

MATERIALS:

Copper, Steel - Galvanized

#30 SHANK FOR ADJUSTABLE PITCH RAFTERS & FASCIA

MATERIALS:

Aluminum - Painted, Copper, Copper - *FreedomGray®, Steel - Galvanized,

NOTES:

* Accessory item is not formed from FreedomGray® coil or sheet product. It is formed from copper product plated with Tin Zinc coating to provide similar color and properties. FreedomGray® is registered trademark of Revere Copper Products, Inc.

PIPE FASTENERS & ACCESSORIES
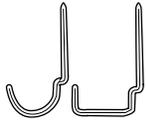

BRICK HOOK - ROUND AND SQUARE

MATERIALS:

Steel - Galvanized, Steel - Painted Galvanized

SIZES:

Round: 3", 4"
Square: 2" x 3", 3" x 4"

PLAIN ROUND SICKLE HOOK

MATERIALS:

Cast Bronze

SIZES:

4"

NOTES:

Non-Stock item - Allow extended lead time

STAMPED SICKLE HOOK FOR WOOD

MATERIALS:

Steel - Galvanized, Steel - Painted Galvanized

SIZES:

Round: 3", 4"
Square: 2" x 3", 3" x 4"
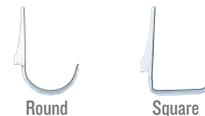

Round   Square

PLAIN ROUND & ROUND CORRUGATED HINGED DOWNSPOUT HOOK

MATERIALS:

Coppered - Copper Plated Zinc Alloy,
Copper - FreedomGray®

SIZES:

Plain Round: 3", 4", 5"
Round Corrugated: 3", 4", 5"

NOTES:

Non-Stock item - Allow extended lead time
Accessory item is not formed from FreedomGray® coil or sheet product. It is formed from copper product plated with Tin Zinc coating to provide similar color and properties. FreedomGray® is registered trademark of Revere Copper Products, Inc.
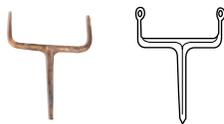

SQUARE SIDE FASTEN HOOK

MATERIALS:

Coppered - Copper Plated Zinc Alloy,
Zinc

SIZES:

Square: 2" x 3", 3" x 4"
Square Wired: 2" x 3", 3" x 4", 4" x 5"

NOTES:

Non-Stock item - Allow extended lead time

SQUARE WIRED HOOK FOR WOOD/BRICK

MATERIALS:

Coppered - Copper Plated Zinc Alloy

SIZES:

Square: 2" x 3", 3" x 4"

NOTES:

Non-Stock item - Allow extended lead time

RACK & KEY

MATERIALS:

Aluminum - Painted, Aluminum - Mill Finish,
Copper, Copper - FreedomGray®,
Steel - Galvanized, Bronze

SIZES:

Square: 2" x 3", 3" x 4"

NOTES:

2 racks recommended per 10' of downspout.
Bronze is Key Only.
Accessory item is not formed from FreedomGray® coil or sheet product. It is formed from copper product plated with Tin Zinc coating to provide similar color and properties. FreedomGray® is registered trademark of Revere Copper Products, Inc.

PIPE FASTENERS & ACCESSORIES

#0 MASONRY DRIVE

MATERIALS:
Bronze, Steel - Galvanized

SIZE:
3 3/4"

NOTES:
Requires Rack & Key.
2 drives recommended per 10' of downspout.

#4 WOOD DRIVE

MATERIALS:
Copper, Steel - Galvanized

SIZE:
3 1/4"

NOTES:
Requires Rack & Key.
2 drives recommended per 10' of downspout.

#5 WOOD DRIVE

MATERIALS:
Iron - Malleable

SIZE:
5 3/8"

NOTES:
Requires Rack & Key.
2 drives recommended per 10' of downspout.

#6 DRIVE

MATERIALS:
Aluminum - Painted, Aluminum - Mill Finish, Copper,
Steel - Galvanized, Steel - Painted Galvanized

NOTES:
Requires Rack & Key.
2 drives recommended per 10' of downspout.

PIPE CLIP

MATERIALS:
Aluminum - Painted, Copper

NOTES:
2 brackets recommended per 10' of downspout.

#31 PIPE CLEAT

MATERIALS:
Aluminum - Painted, Copper

NOTES:
2 cleats recommended per 10' of downspout.

#32 PIPE CLEAT

MATERIALS:
Aluminum - Painted, Copper

NOTES:
2 cleats recommended per 10' of downspout.

UNIVERSAL CONDUCTOR BAND

MATERIALS:

Aluminum - Painted, Amluminum - Mill Finish, Copper,
Steel - Galvanized, Steel - Painted Galvanized, Steel - Paint Grip

NOTES:

2 bands recommended per 10' of downspout.

UNIVERSAL CONDUCTOR BAND

MATERIALS:

Aluminum - Painted, Copper,
Steel - Galvanized

SIZES:

3", 4"

NOTES:

2 bands recommended per 10' of downspout.

ORNAMENTAL PIPE BAND
(FOR 2" X 3" DOWNSPOUT ONLY)

MATERIALS:

Aluminum - Painted, Copper,

NOTES:

2 brackets recommended per 10' of downspout.

DIAMOND PIPE BAND

MATERIALS:

Aluminum - Painted, Copper, Steel - Galvanized

NOTES:

2 brackets recommended per 10' of downspout.

WIRE STRAINER

MATERIALS:

Aluminum - Mill Finish, Copper,
Steel - Galvanized

SIZES:

2", 3", 4", 5", 6"

NOTES:

Can be use in square/rectangular holes when
reformed by hand.

UNIVERSAL LEAF STRAINER - EXPANDABLE

MATERIALS:

Aluminum - Mill Finish, Steel - Galvanized

SIZES:

Fits 3" and 4"

NOTES:

Can be use in square/rectangular holes when
reformed by hand.

GUTTER PROTECTION

GUTTER PROTECTION:

Gutter Guard	Splash Block	Flex-Drain Components
Gutter Clips	Flex-A-Spout®	Catch-A-Raindrop
Gusher Guard	Downspout Adapter	Flex-Elbow
Half Round Gutter Guard	Flex-Drain®	TitanGuard™

GUTTER GUARD

NOTE: Berger Gutter Guards are designed to prevent leaves and debris from entering gutters, roof eaves and troughs. Product performance can vary depending on proper installation, product selection, gutter orientation, roof material and slope. Winter weather may cause snow and ice to accumulate at roof eaves. Ice damming can result from improper roof ventilation and inadequate insulation. Heat radiating from below the roof and sun radiation melt snow and it freezes again when temperatures drop below freezing. Icicles can form on roof edges due to these conditions whether or not gutters or guards are installed. This is a natural process beyond the manufacturers control and we accept no responsibility for ice and snow accumulation or related consequences. Leaf Guards are sold as debris protection devices. The manufacturer assumes no responsibility for any other result of this product use.
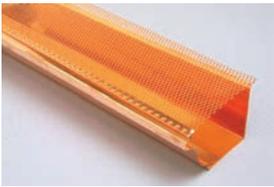

K-STYLE DROP-IN GUTTER GUARD

MATERIALS:
Aluminum - Mill Finish, Copper, Steel - Galvanized

WIDTH:
5", 6"

LENGTH:
3', 4'

K-STYLE HINGED GUTTER GUARD

MATERIALS:
Aluminum - Mill Finish, Copper, Steel - Galvanized, Steel - Painted Galvanized

WIDTH:
5", 6" , 7"

LENGTH:
3', 4'

NOTES:
- Strong convex design resists collapse
- Hinged design folds up for easy gutter cleaning
- Hinged Guard Clips for standard style "K" gutters only

K-STYLE LOCK-ON GUTTER GUARD

MATERIALS:
Steel - Painted Galvanized w/ Standard Mesh, Steel - Painted Galvanized w/ Fine Mesh

WIDTH:
5", 6"

LENGTH:
4'

K-STYLE TITANGUARD GUTTER COVER

MATERIALS: Aluminum

WIDTH: 5", 6"

LENGTH: 4', 10'

NOTES:
- Keep debris out and allow water to flow into gutters easily with the TitanGuard™ Gutter Guard. The build-up of leaves, pine needles and other small elements can obstruct the flow of water off the roof and potentially cause damage to the wood on the edge of a roof. With an easy installation, two-step process, a TitanGuard can prevent clogged gutters while having a low-profile that blends into the roof line.
- 20-year performance warranty.

TitanGuard™

K-STYLE SOLID SNAP-IN PLASTIC GUTTER COVER

MATERIALS: PVC

WIDTH: 5", 6"

LENGTH: 4'

NOTES:
- Flexible design made of rigid PVC accommodates many different pitched roofs
- Solid bull nose design allows water to roll into the gutter through the process of surface adhesion
- Easy-to-install 4 foot sections fit standard 4", 5" and 6" metal gutters

---

K-STYLE DIAMOND GUTTER SHIELD PRO

MATERIALS: Aluminum - Powder-coated

WIDTH: 5", 6"

LENGTH: 4'

NOTES:
- Pressure fit design makes installation easy - no fasteners needed
- Compatible with asphalt, tile or metal roof system
- Drip lip reduces tiger striping
- Tested to handle the heaviest of rainfall - up to 40" per hour
- High impact powder coat finish reduces scratching and cracking

DIAMOND Gutter Shield™

K-STYLE SNAP-IN PLASTIC GUTTER COVER & FILTER

MATERIALS: PVC

WIDTH: 4", 5", 6"

LENGTH: 3'

NOTES:
- Made of high quality, rigid PVC
- Snap-in design will not collapse under debris
- Snap-in design for easy installation

For Gutter Filter (with Mesh):
- Install Mesh Gutter Filter with screen facing upward

GUARD CLIPS, GUSHER GUARD, HALF ROUND GUTTER GUARD

HINGED GUARD CLIPS

MATERIALS:

Steel - Stainless

NOTES:

- 8 pieces per pack
- 25 packs per box (200 pcs)
- Available for K-Style and Half-Round Gutters

GUSHER GUARDS

MATERIALS:

Aluminum - Painted

NOTES:

- Attach to front top lip of gutter where overflows occur
- Requires screw or rivet attachment
- Use on inside mitered corners

K-STYLE GUTTER GUARD WITH SNAP CLIP

MATERIALS:

Aluminum - Painted, Aluminum - Mill Finish

WIDTH:

5", 6"

LENGTH:

4'

NOTES:

2 options:
- Rests inside the back lip of the gutter
- Rests on top of the back lip of the gutter

HALF ROUND HINGED GUTTER GUARD

MATERIALS:

Aluminum - Mill Finish, Copper, Steel - Galvanized

WIDTH:

5", 6"

LENGTH:

3'

NOTES:

- Convex hinged design provides strength and allows access to gutters
- 5in and 6in widths fit standard half round gutters
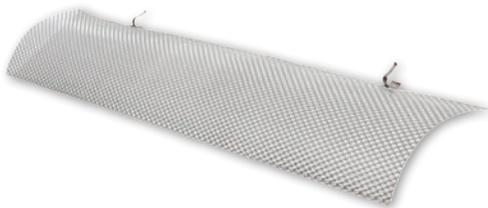

SPLASH BLOCK, FLEX-A-SPOUT®, FLEX-DRAIN®, DOWNSPOUT ADAPTER

SPLASH BLOCK
(Brown Shown)

MATERIAL: PVC

WIDTH: 11.5"

LENGTH: 24"

Green   Stone   Slate

FLEX-A-SPOUT®
(Green Shown)

NOTES:
- Expands from 22" to 55"
- Can be used with both 2"x3" and 3"x4" downspout
- Easy Installation - Extend, Bend & Connect
- Connects to to other FLEX-A-Spout accessories

Black   Tan

Brown   White

FLEX-DRAIN®

SIZE: 4" diameter

LENGTH: 8', 12', 25', 50'

NOTES:
- Exceeds ASTM standards
- Made with no-break copolymers for professional grade strength and integrity
- Proprietary peak and valley design offers greater surface area and a 30% higher load-bearing rating than standard corrugated pipe

FLEX-Drain
Professional Grade Drainage Solutions

Solid   Perforated   Perforated w/ sock

DOWNSPOUT ADAPTER

DIMENSION:
2" x 3" x 4"
2" x 3" x 3"
3" x 4" x 4"

NOTES:
- Connects 2 x 3 and 3 x 4 downspouts to 3 or 4 inch drainpipes Extends up to 16 inches
- Easy Installation - Extend, Bend & Connect
- Connects to other FLEX -A-SPOUT accessories

FLEX-DRAIN®
COMPONENTS

FLEX-DRAIN COUPLER

MATERIAL:
Plastic

NOTES:
- Female coupler joins 2 cut pieces of FLEX-Drain® together
- Used to adapt FLEX-Drain® to some wyes and tees to improve the fit and function of the overall system

FLEX-DRAIN ELBOW CONNECTOR

MATERIAL:
Plastic

NOTES:
- Expands up to 21" to connect 3" and 4" corrugated pipe and 4" PVC.
- Creates any angle or turn
- Expands to reach pipes that have been cut short
- An excellent repair piece for damaged sections of pipe

FLEX-DRAIN T/Y

MATERIAL:
Plastic

NOTES:
- Flexes to create custom Y and T joints
- Works with 3" and 4" corrugated pipe and 4" PVC
- Flexes and bends to fit most any angle

FLEX-DRAIN UNIVERSAL PIPE CONNECTOR

MATERIAL:
Plastic

NOTES:
- Features an inner dimension that connects to 3" pipe and an outer dimension that connects to 4" pipe
- The most economical solution for connecting FLEX-Drain®, 3" and 4" corrugated pipe and 4" PVC

CATCH-A-RAINDROP™, FLEX-ELBOW®

CATCH-A-RAINDROP™

MATERIAL:	**SIZE:**	**NOTES:**
Plastic	2" x 3" 3" x 4"	• Filters large or coarse debris from your downspout to help prevent clogs • Made of durable white PVC plastic • Diverts filtered rainwater into a storage tank or rain barrel or directly to a garden • Fits 2 x 3" and 3 x 4" downspouts • Convenient snap-in design installs easily

3" x 4"   2" x 3"

FLEX-ELBOW

MATERIAL:	**SIZE:**	**COLOR:**	**NOTES:**
Plastic	2" x 3"	White, Brown	• Expands 8" to 18" • Use with Aluminum, Steel, or Vinyl • Fits 2" x 3" downspout and 4" and 5" gutters • Easily bends and holds its shape

Metal Bender Tool

# TRIM COIL, GUTTER COIL, VALLEY FLASHING

TRIM COIL

MATERIALS:
Aluminum - Painted (Smooth),
Aluminum - PVC Coated*
*PVC has wash coat on reverse side

WIDTH:
7", 10", 12", 14", 16",
18", 20", 24"

NOTES:
Unless otherwise specified,
smooth colors have Lomar
White on the reverse side

GUTTER COIL

MATERIALS:
Aluminum - Painted, Copper

TYPE:
5K, 6K

WIDTH:
11 3/4", 11 7/8", 15"

THICKNESS:
.027, .032, 16oz (copper)

NOTES:
Available in Standard and Mini
coils for aluminum.
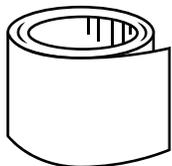

VALLEY FLASHING

MATERIALS:
Aluminum - Mill Finish, Copper, Steel
- Galvanized

WIDTH:
4", 6", 8", 10", 12",
14", 16", 18", 20",
24", 28", 30", 36"

THICKNESS:
.0078, .009, .014, .0167,
32ga (Steel)
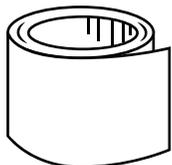

COPPER FLASHING

MATERIALS:
Copper

WIDTH:
.021 (standard): 8",
10", 12", 14", 16", 18",
20", 24"
3oz: 8", 10", 20"

THICKNESS:
.021", 3oz

COLD ROLLED COPPER COPPER SHEETS

MATERIALS:
Copper

SIZE:
3' x 8', 3' x 10',
4' x 10'

THICKNESS:
16oz

NOTES:
Available in skids only.
Approximately 1,920 lbs / skid

METAL BENDER TOOL

METAL BENDER TOOL

MATERIALS:

Die Cast Aluminum

PARTS AVAILABLE:

Metal Bender Tool with 3 1/2" Blades standard,
7" & 10" Blades for Metal Bender Tool also available

SNOW GUARDS

NOTE: Snow Guards are intended to prevent snow movement and provide for the controlled melt and breakdown of the snow mass into smaller sections, reducing the potential for snow and ice damage to gutters, foundation plantings, parked vehicles, adjacent roofs and equipment, and injury to pedestrians. Berger Snow Guard Application for Metal Roofing Quick Reference Guide is in the Appendix. Please refer to this product chart to ensure accuracy of your order.

RT® SNOW GUARD SERIES

MATERIALS:

Aluminum - Powder Coated,
Aluminum - Mill Finish,
*Aluminum - E-Coat Epoxy Primer, Bronze
  *Requires final color coat by contractor

STYLES:

RT-200:
  Seams up to 3/16" thick & 1" high
RT-300:
  Seams up to 9/32" thick & 1" high

NOTES:

RT Snow Guards are non-penetrating devices which are secured to the standing seams of metal roofs utilizing stainless steel set screws to clamp them in place and will not restrict thermal movement. They are particularly suited to double-lock and mechanically seamed metal roofing.
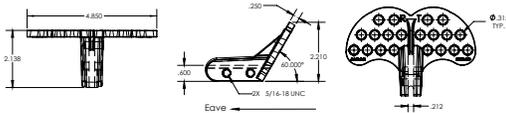

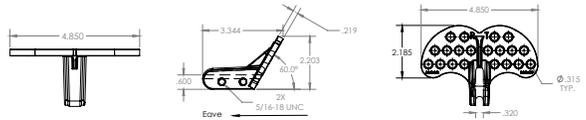

AP SNOW GUARD SERIES

MATERIALS:

Aluminum - Powder Coated,
Aluminum - Mill Finish,
*Aluminum - E-Coat Epoxy Primer
*Requires final color coat by contractor

STYLES:

AP-400:
  Seams up to 3/8" thick & 1 1/2" high
AP-516:
  Seams up to 1/2" thick & 1 1/2" high

NOTES:

AP Snow Guards are non-penetrating devices which are secured to the standing seams of metal roofs utilizing stainless steel set screws to clamp them in place and will not restrict thermal movement. The wide, deep blade design makes it particularly effective in retaining snow with the higher seams and wider panel widths common in preformed architectural roofing.

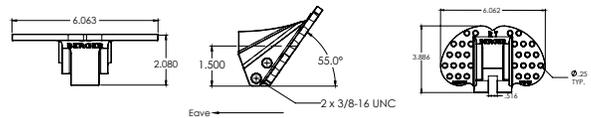

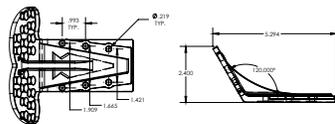

SM SNOW GUARD SERIES

MATERIALS:

Aluminum - Mill Finish, *Aluminum - E-Coat Epoxy Primer
*Requires final color coat by contractor

NOTES:

SM- Surface Mount Snow Guards are manufactured of cast aluminum and are designed to be adhered to the pan surface of prefinished metal roofs using either a high strength construction adhesive or a combination of mechanical fasteners and an adhesive/sealant. They are particularly effective in retaining snow and ice on metal roofs where there are no suitable seams to which a seam mounted device can be fastened, including batten and cap seam panels.

Use #10 Self Taping Screw

RAIL PRODUCTS ARE SOLD BY THE JOB, NOT BY THE FOOT. TO GIVE AN ACCURATE QUOTE, THE FOLLOWING IS NEEDED:

1. Where is the building located?

2. What is the type of standing seam roof?

3. What configuration of rail is wanted – 1, 2, or 3 rails?

4. What are the dimensions of the roof – Eave to ridge, eave width and pitch?

5. How many inches on center are the standing seams?

6. What finish would be needed – painted, primer or mill finish?

SEAM SPECS:
1/2" WIDE
2" HIGH MAX.
4 SCREWS PER BRACKET

SNOW GUARDS

RT® CLEAR SNOW GUARD

MATERIALS:
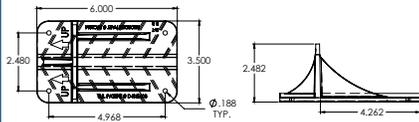

Clear Polycarbonate w/ UV Stabilizers

STYLES:

Structural Rib, Surface Mount

NOTES:

Clear Snow Guards are manufactured in a high clarity polycarbonate plastic with U.V. stabilizers which provide strength and longevity. The Structural Rib guard is designed to fit over stiffening rib on residential panels. The Surface Mount are particularly effective in retaining snow and ice on metal roofs where there are no suitable seams to which a seam mounted device can be fastened, including batten and cap seam panels. Both have a low visibility and blend with roof materials and can be attached with adhesives, screws or a combination of both.

Surface Mount

Struct. Rib

RT® MINI CLEAR SNOW GUARD

MATERIALS:

Clear Polycarbonate w/ UV Stabilizers

STYLE:

RT Mini

NOTES:

Mini CLear Snow Guards are manufactured in a high clarity polycarbonate plastic with U.V. stabilizers which provide strength and longevity. These are designed to fit between the stiffening ribs of residential metal roof panels. They have a low visibility and blend with roof materials. They can be attached with adhesives, screws or a combination of both. Not for use with panels with seams or ribs more than 12 inches apart.

Use #10 Self-Taping Screw
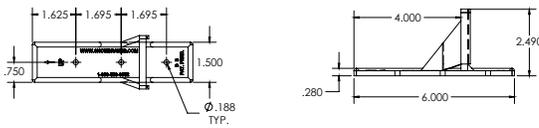

SUREBOND HIGH STRENGTH ADHESIVE CAULK

MATERIALS:

SB-190 10.3 oz Tubes

NOTES:

SB-190 is a field proven sealant adhesive. This unique formula possesses up to 2000 lbs. of tensile strength, but requires 28 consecutive days (672 consecutive hours) with temperatures of 50 degrees Fahrenheit or greater to fully cure. Under certain conditions, temporary measures may need to be employed to hold the snow guard in place until initial set of adhesive has taken place. One tube will adhere 8-10 CL Snow Guards and 14-16 RTMINI Guards.

The adhesives are offered for the convenience of the user who assumes full responsibility for its use. These adhesives are used throughout the industry for adhering snow guards with successful results utilizing the directions of the adhesive manufacturer. Adhesive failure does not constitute Berger products defect and is not the responsibility of Berger.

## SG-1 SNOW MEISTER SNOW GUARD FOR DOUBLE LOCK STANDING SEAM ROOFS

MATERIALS:

Aluminum - Mill Finish,
*Aluminum - E-Coat Epoxy Primer,
**Bronze - Polished
   *Requires final color coat by contractor
   **Non-Stock, Special Order

STYLE:

Fits both: Double Lock Standing Seam
1" & 1 1/2" High Seams
1.0" Deep x .211" Wide

NOTES:

Painted Aluminum & Bronze: Requires extended lead time, no cancellation or return.

MULLANE #100 SERIES FOR NAILING ON NEW INSTALLATIONS (SHINGLES OR SLATE)

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Series #100	Slate Roofs	100S-NA	100 pieces / ctn Can be purchased individually
		Asphalt Roofs	100S-AS	

MULLANE #100 SERIES WITH RETRO-HOOK FOR EXISTING SLATE ROOFS

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Series #100	Slate Roofs	100S-RH	100 pieces / ctn Can be purchased individually

MULLANE #200 SERIES FOR SOLDERING

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Series #100	#200	200CPSM	100 pieces / ctn Can be purchased individually

MULLANE #200 SERIES FOR NAILING ON NEW INSTALLATIONS (SHINGLES • OR SLATE)

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Series #200	Slate Roofs	200S-NA	100 pieces / ctn Can be purchased individually
		Asphalt Roofs	200S-AS	

MULLANE #200 SERIES WITH RETRO-HOOK FOR EXISTING SLATE ROOFS

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Series #200	Slate Roofs	200S-RH	100 pieces / ctn Can be purchased individually

MULLANE #200 SERIES WITH HOOK FOR TILE ROOFS

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Series #200	Tile Roofs	200CPT	100 pieces / ctn Can be purchased individually

MULLANE #300 SERIES FOR SOLDERING

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Series #300	#300	200CPSM	100 pieces / ctn Can be purchased individually

MULLANE #300 SERIES PAD STYLE FOR NAILING - NEW INSTALLATION (SHINGLES/SLATE)

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Series #300		300S-NA	80 pieces / ctn Can be purchased individually
		Asphalt Roofs	300S-AS	

MULLANE #300 SERIES WITH RETRO-HOOK FOR EXISTING SLATE ROOFS

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Series #300	Slate Roofs	300S-RH	80 pieces / ctn Can be purchased individually

MULLANE #400 CLASSIC SERIES, EAGLE DESIGN

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Eagle	#400	400EGLBRZ	50 pieces / ctn Can be purchased individually

MULLANE #400 CLASSIC SERIES, OAK LEAF DESIGN

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Oak Leaf	#400	400LEAFBRZ	50 pieces / ctn Can be purchased individually

MULLANE #400 CLASSIC SERIES, FLEUR-DE-LIS DESIGN

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Bronze	Fleur-de-Lis	#400	400FDLBRZ	50 pieces / ctn Can be purchased individually

MULLANE MODEL #630 SNOW BOSS FOR METAL ROOFS

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Aluminum	Mill Finish	#630	630M	50 pieces / ctn Can be purchased individually

MULLANE MODEL #640 SNOW BOSS FOR METAL ROOFS

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Aluminum	Mill Finish	#640	640M	50 pieces / ctn Can be purchased individually
	E Coat Epoxy Primer		640E	

MULLANE MODEL #650 SNOW BOSS FOR METAL ROOFS

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Plastic	Clear Polycarbonate w/ UV Stabilizers	#650	650C	50 pieces / ctn Can be purchased individually

MULLANE MODEL #690 SNOW BOSS FOR METAL ROOFS

MATERIAL:	STYLE:	TYPE:	SKU:	PACKAGING:
Aluminum	Mill Finish	#690	690M	50 pieces / ctn Can be purchased individually

MULLANE MODEL #500 BRONZEGUARD SNOW FENCE BRACKET (FOR 3 PIPES)

TECHNICAL REFERENCE APPENDIX

Berger requires that all materials be evaluated for fitness use by the user prior to application Berger will not be responsible for misapplication of product, incorrect material or defects that were obvious at time of installation; consequential damage, schedule delays, labor and equipment rental. Our warranty is limited to our cost of materials on product determined to be a manufactured defect. Claims for defective material damaged due to snow and/or ice loads are not covered by our warranty unless Berger snow guards have been utilized and installed per our installation instructions. For further information on proper use of these products please review this Technical Reference Appendix, the SMACNA Architectural Sheet Metal Manual 5th Edition or the AIA Architectural Graphic Standards 6th Edition.   The information included in this Appendix has been derived for the SMACNA Architectural Sheet Meta Manual 5th Edition and the AIA Architectural Graphic Standards 6th Edition. For full copies of these industry manual Please contact:

COIL & SHEET METAL GOODS SPECIFICATIONS (GUTTER & DOWNSPOUTS)

ALUMINUM
Mill Finish Aluminum
Metal: ASTM 8209 – Temper & Alloy 3105 H14
Finish: None

Painted Aluminum
Metal ASTM B209 – Temper & Alloy 3105 H14
Finish: .65 - .70 MIL Thick Polyester Finish a Bonderized / Phosphatized Finish

COPPER
Natural Copper
Metal: ASTM B370 – CDA110 or CDA 122 Alloy - Cold Rolled
Finish: None

Revere FreedomGray Zinc Coated Copper*
Metal: ASTM B370 – CDA110 or CDA 122 Alloy - Cold Rolled
Finish: Z – T Alloy (Zinc – Tin)
*FreedomGray® is a registered trademark of Revere Copper Products, Inc.

STEEL
Galvanized Steel
Metal: ASTM A653 – LFQ (Lock Form Quality)
Finish: Hot Dipped Galvanized Zinc Coating

Painted Galvanized Steel
Metal: ASTM A653 – LFQ (Lock Form Quality)
Finish: Hot Dipped Galvanized Zinc Coating with a .20 - .30 Mil Thick Epoxy and a .70 - .80 Mil Polyester Finish

Paintgrip Galvanized Steel
Metal: ASTM A653 – LFQ (Lock Form Quality)
Finish: Hot Dipped Galvanized Zinc Coating

Stainless Steel
Metal: 304 Alloy
Finish: 304 Alloy

PATINA CHEMICAL SOURCES

Copper will Patina naturally in most areas with 7 years when exposed to normal air quality and moisture. Areas that are dry or at high altitudes Will take longer or not react to environmental surface oxidation. Berger Building Products, Inc. provides this information as a service with the understanding that the results of the chemical patina will vary and Berger assumes no liability. Berger cautions the user that the user is responsible for the results. The user must also comply with all manufacture safety recommendations on handling and disposing of chemicals in accordance will all Local, State and Federal EPA Guidelines. User can check for other sources on the internet, phone and industrial directories.

Triple-S Chemical Products, Inc. – Los Angeles (800) 862-5958
Patina Solutions (800) 882-7004
Jax Chemical So. – Floral Park, NY (718) 347-0057

The Copper Development Association (CDA) provides information on the use of copper for every purpose known to man at the website: http://www.copper.org. For specific information on architectural copper finished go to http://www.copper.org/applications/architecture/finishes.html.

STORAGE AND HANDLING OF PRODUCT

Berger products must be stored in a properly ventilated, dry environment to prevent condensation on metal surfaces Materials that are store in areas subject to temperature variations, outside storage or subjected to moisture damage are not returnable. Galvanized Steel and Zinc surfaces are susceptible to humid storage stain or white rust. SMACNA Guidelines for storage and handling of materials apply. Refer to SMACNA Appendix A-5 Sections 1.7, 1.8 and 1.9.

GUTTER HANGER SELECTION

In deciding which hander is most acceptable, please consider such things as appearance, expected life, ice loading, size of gutter, material and expansion. When fascia board is less than 2" thick, the hanger fasteners must be driven into the rafter ends. In area subject to snow slide, coordinate the front edge elevation of the gutter with the extended roof line (see Table on Required Clearance of Gutter Below Extended Roof Line).

RECOMMENDED GUTTER HANGER SPACING

Gutter hangers should be spaced at a maximum of 36" on center. In areas where ice and snow are long lasting, hanger spacing should be reduced to 18" on center.

RECOMMENDED GUTTER PITCH AND POSITION ON THE EAVE

There are two factors that go into determining gutter positions on the eave: the pitch of the gutter and the roof slope. Gutter should be itched 1/16" or greater per foot for proper drainage. Gutter can be run level for appearance but additional downspout will be necessary. (See section on Proper Gutter and Downspout Sizing). Gutters should be placed below the extended roof line so that snow and ice can slide clear. Steeper pitches require less clearance.

| REQUIRED CLEARANCE OF GUTTER BELOW EXTENDED ROOF LINE	
0 in 12 – 2 in 12	1"
3 in 12 – 5 in 12	3/4"
6 in 12 – 8 in 12	1/2"
9 in 12 or Greater	1/4"

LAP JOINT SPECIFICATION

Joints in gutters must be overlapped I", riveted on 2" centers and soldered if the metal can be soldered (See soldering instruction for details). With Metals that cannot be soldered, SeamerMate® Sealant must be continuously applied with a I" lapped joint and sealed lap must be riveted on I" centers.

All rivet applications must receive sealant after installation. Lapping joints in the direction of the flow is preferred; gutter outlet connections may not fit this condition. Lock joints on miters and elbows should be checked and sealed or soldered. End caps and outlets require flange laps to be sealed or soldered.

PENETRATING WALL FASTENERS

Berger recommends drilling holes in masonry and the sue of metal hole inserts and/or FlashMate® Sealant when installing these pipe hook fasteners. Wall penetrations need to be sealed to prevent water intrusion and related problems. Driving these into brick mortar joints will cause damage to the pipe hook fasteners and the wall.

TYPICAL GUTTER HANGER DETAILS
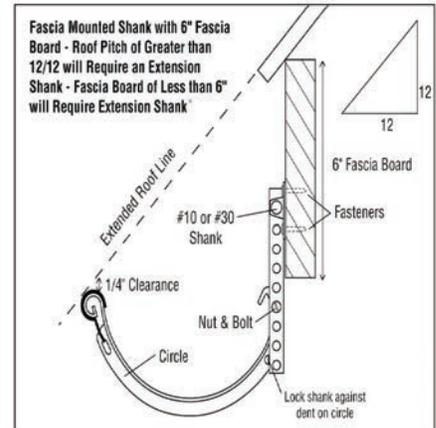

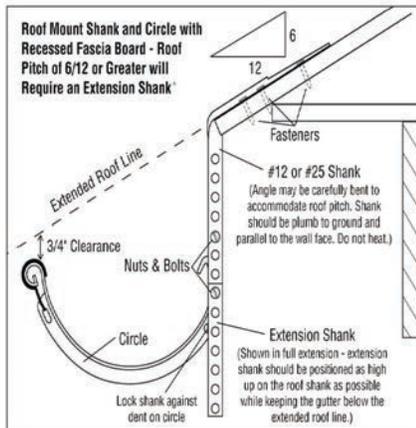

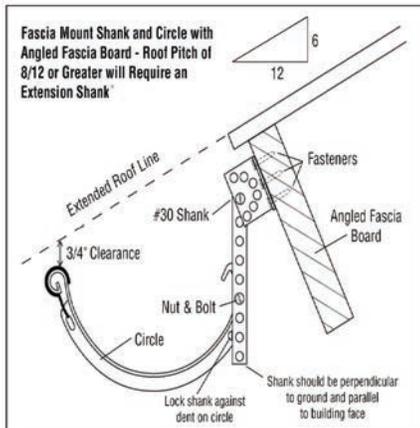

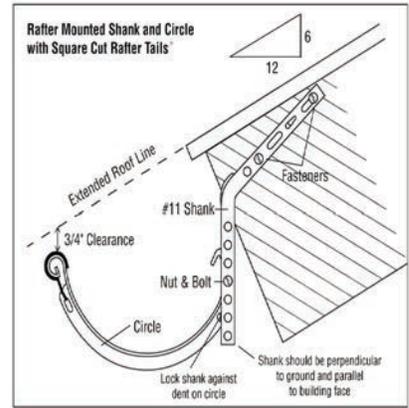

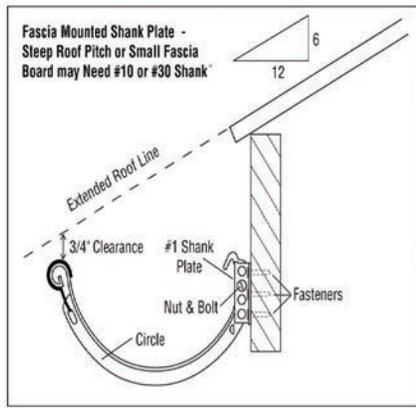

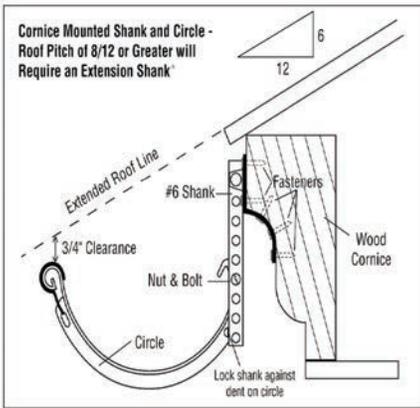

*Only I hole will line up with bolt center distance on shank is I/2". Center distance on circle is 3/8". This allows the gutter to be pitched by lowering the circle on the shank in increments of I/8". Berger does not imply fitness of use of our components in conjunction with competitors products. Berger will not warrant any system that incorporates products not manufactured by Berger.

GALVANIC CORROSION

The selection of gutter material must account for the potential of Galvanic or Electrolytic Corrosion at contact points with other metals and at supports. Also, special selection is requited for corrosive environments such as coastal or polluted industrial atmospheres. Galvanic or Electrolytic Corrosion can occur when dissimilar metal are in contact in the presence of an electrolyte. An electrolyte is any non-metal substance that will conduct an electric current, especially a liquid solution. Water, particularly rainwater, is a good electrolyte.
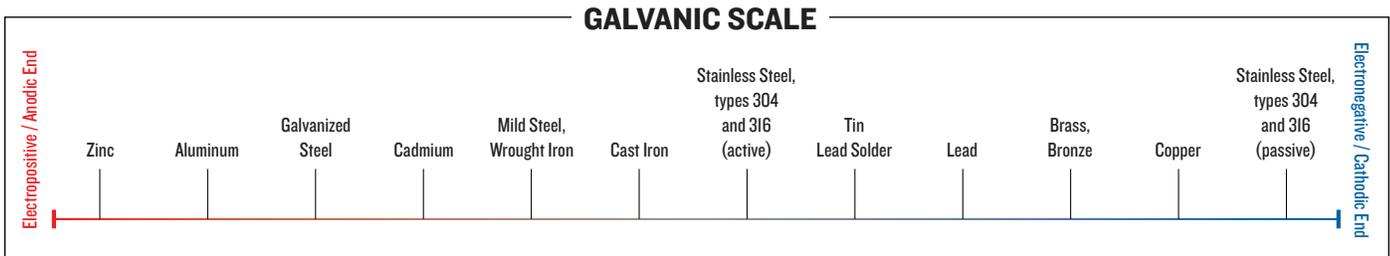

A galvanized scale has been developed for metals. Metals that are more electropositive (anodic) will corrode more easily and metals that are more electronegative (cathodic) are more corrosion resistant. When two dissimilar metals are in contact in the presence of an electrolyte, the electropositive metal will corrode. The farther the two metals are from each other on the galvanic scale, the speed and effect of the reaction will increase.

GALVANIC SCALE

| Electropositive / Anodic End | Zinc | Aluminum | Galvanized Steel | Cadmium | Mild Steel, Wrought Iron | Cast Iron | Stainless Steel, types 304 and 316 (active) | Tin Lead Solder | Lead | Brass, Bronze | Copper | Stainless Steel, types 304 and 316 (passive) | Electronegative / Cathodic End |

To reduce the tendency for galvanic corrosion to occur between dissimilar metals one or more of the following actions can be taken:

1. Avoid contact between metals that are farther apart on the scale.

2. Do not couple a small exposed area of a more electropositive (anodic) metal with a large area of a more Electropositive (cathodic) metal. Fasteners are a particular concern in this regard.

3. Coat the electropositive (cathodic) metal with a suitable paint or other non-metallic coating(or coat both surfaces at their interface). Zinc chromate or bituminous coatings are often used.

4. Separate the metals by tape, gasket, waterproof paper, elastomeric sheet, sealant or other non-absorbent, Non-conductive material.

5. Do not allow moisture runoff from a more electronegative (cathodic) metal to drain n a more electropositive (anodic) metal, even if the metals are not in contact.

6. Remove metal particles that are deposited from steel dies on formed metals (or prevent the deposits from occurring).

Miscellaneous Information about Galvanic Corrosion:

1. Passivated stainless steel has been chemically cleaned, usually with an acid solution.

2. Anodized aluminum is considered compatible with all other metals.

3. Slats increase the electrical conductivity of water.

4. The discharge from drain pipes on rooftop air-conditioning units can be very corrosive, particularly if the piping is copper and the drainage goes into galvanizes steel scuppers, conductor heads or gutters.

5. Coppers nails / fasteners should not be used for fastening galvanized steel roof panels even though the contact area of the more Electropositive (anodic) zinc coating is small compared to the more electronegative (cathodic) copper metal. Galvanized steel nails / Fasteners will corrode rapidly if used on copper roofing.

6. Many organizations and individuals have published corrosion tables. All of them tend to rank corrosion rates in non-quantitative terms such as mild, moderate and severe. Rates of corrosion are also affected by conditions such as seacoast, dry inland, acid rain and polluted industrial atmospheres.

Additional information on galvanic corrosion prediction is found in ASTM Standard G82 and ASTM STP 576.

Note: colors vary depending on position and angles.

ORDERING

Enter degree code (_) and color code (• •) when ordering.

For example: PR _ • • 3 filled out as PROSA3 would be a 3″ Aluminum Painted Elbow at 30° and painted Saddle *(page 21)*.

Please enter the whole code with no spacing. If you have any questions, please call us at (800)523-8852.

SNOW GUARD APPLICATION FOR COMPOSITION ROOFING

Quick reference guide, see product details prior to ordering.
