

Western red cedar siding

■ AUTHENTIC WESTERN RED CEDAR

ABOUT WESTERN RED CEDAR

Western Red Cedar is one of North America's great renewable resources. Slow growing and naturally durable, Western Red Cedar has one of the longest life spans of any North American softwood. It is free from pitch and its heartwood has natural decay resistance. It's low density gives it an insulation value superior to most other species. Light weight, easy to work, easy to finish, possessing outstanding dimensional stability, Western Red Cedar is a preferred wood for nearly all purposes where attractive appearance or resistance to weather is important.

WRC BENEFITS

PROTECTION ON THE INSIDE

Natural resistance to decay and insects

DIMENSIONAL STABILITY

Will absorb or discharge moisture to attain equilibrium

LOW DENSITY

Lightweight, great insulation value and thermal conductivity

GREAT WORKABILITY

Easy to work with both hand and machine tools

AMAZING SUSTAINABILITY

Widely recognized as the ultimate sustainable timber
